

Pictures to Identify Model & Production Date

To identify model of hub.

Notice:

Each hub can have more Versions.

Some parts can be NOT COMPATIBLE.

Photos from different Directions can help us identify hub correctly & provide correct technical Information to you.

We need to see Left Side Side Cap to to easier Identify Version of hub.

Pictures to Identify Model & Production Date

On hub flange are pressed 2 characters which let us know production date.

From this direction we can see Right Side Cap

In this direction of opened Hub we can see what Axle is using in hub & also Gear Area.

Pictures to Identify Model & Production Date

On Cass.body are pressed 3 characters which let us know production date.

If there is problem with functioning of Cass.body we need to see if Stoppers are broken or not.

Two pictures of Cass.body from Front and Rear side Direction and Ride Side Cap help us identify Compatibility.
